

Yingjie Sun

Industrial & Product Designer | Physical Products

13515249897 2950884508@qq.com

I explore product form, CMF and component relationships around use, making proposals tangible through 3D.

Design focus

Product form: Compare proportion and use in lighting, HUUH CARE and GO GLOW.

CMF and 3D: Study materials, edges and scale through models and rendering.

Engineering context: Bring awareness of standards, quality and constraints from manufacturing.

Experience

Hangzhou Liling Enterprise Services | Brand design & project coordination

2026.02 - Present

Design and iterate Biyuan AI's visual identity and UI.

Collaborate on Periastra identity and information systems, and YELISI brand, product concepts and CMF studies.

HannStar Board | Design systems engineering designer

2025.08 - 2026.01

Worked on design-systems engineering in PCB manufacturing, within standardisation, engineering and quality constraints.

BENWU | 3D designer

2025.03 - 2025.12

Contributed 3D design and visual presentation to Hermès and Arc'teryx window projects.

Developed lighting visualisations and material comparisons; organised the Karimoku × BENWU design study.

Hunan Ouyin Culture & Media | Design assistant

2023.12 - 2025.02

Organised market research and user feedback; built Figma prototypes to support design comparisons and iteration.

Tools and independent practice

Product and 3D: Rhino, SolidWorks, KeyShot, Cinema 4D, Blender

Visual and digital: Photoshop, Illustrator, Figma; React / TypeScript

AI and research: Codex, ChatGPT, ComfyUI, Midjourney; market and cultural context; Image 2.5, Seedance 2.5

Independent AI practice: character sheets, lighting studies and an ink film, a Mini DV coffee vlog and an autumn single-take fashion film connect visual constraints, prompts and human review with 3D and brand expression.

Education

Changzhou Institute of Technology | BA Product Design

2021.09 - 2025.06

Portfolio / complete cases and design process
