From form to system

I design physical products, visual systems and AI-native workflows, connecting form, CMF, 3D and brand. I start with use and materials, then develop ideas through models, prototypes and comparison.

Understand use and constraints, then compare form, materials, hierarchy and interaction. Models and prototypes make choices discussable. AI supports references, variations and workflows; people retain judgment and verification.

FORM / SYSTEM / INTELLIGENCE

2026.02 — Present

Hangzhou Liling Enterprise Services

Brand design & project coordination

2025.08 — 2026.01

Hermès — Seasonal Window Worlds

Contributing to three seasonal window narratives through merchandise, props, material and light.

My role

BENWU team · 3D design & visual presentation

Stage

Commercial window-design archive

The public case records BENWU collaboration, Yingjie Sun's participation in 3D design and visual presentation, and retained project views. The newly supplied Summer, Autumn and Winter board sets are treated as Level C retrospective reconstruction material until primary sources are verified. Individual leadership, France communication, production and store-delivery boundaries remain unverified.

Credits and context / Level B

BENWU team collaboration; spatial and visual design by Yingjie Sun; Hermès branding and trademarks belong to their rights holders

AI / Human: The current project record does not document AI as a source of the design outcome; the page presents verified team collaboration and 3D/visual participation, while personal delivery boundaries remain unverified.

Human review: Human review of 3D design and visual presentation within the team; Review of merchandise hierarchy, prop scale and window proportions; Production, store and mall delivery boundaries require source records

Arc'teryx — Mountain Performance Field

Translating terrain, bodies and equipment into spatial layers for the Alpha Center window display.

My role

BENWU team · 3D design & spatial visualisation

Stage

Commercial window–design archive

The public case presents BENWU collaboration, Yingjie Sun’s participation in 3D design and visual presentation, and the retained Alpha Center window view; individual leadership, production, display, sales or performance outcomes are not inferred from imagery.

Credits and context / Level B

BENWU team collaboration; spatial and visual design by Yingjie Sun; Arc'teryx branding and trademarks belong to their rights holders

AI / Human: The current project record does not document AI as a source of the design outcome; the case presents verified team collaboration and 3D/visual participation without inferring performance or personal delivery outcomes.

Human review: Human review of 3D design and overall composition within the team; Review of equipment, body and spatial occlusion; Production and store–display boundaries require source records

我国残疾人数量庞大，是社会发展中不容忽视的重要群体。

随着社会的进步，人们开始重视弱势群体，特别是残疾人。残疾人是社会中的一个特殊群体，他们由于身体上的缺陷，在社会生活中面临着许多困难。然而，他们也有着自己的长处和优点。因此，社会应该给予他们更多的关爱和尊重，帮助他们克服生活中的困难，实现自己的人生价值。

用户角色画像01

个人信息:

姓名: 王小明 年龄: 25岁 性别: 男 职业: 设计师

社会特征:

教育程度: 本科毕业 婚姻状况: 未婚 兴趣爱好: 阅读、运动、旅行

痛点分析:

1. 出行不便 2. 生活成本高 3. 社交圈子小 4. 缺乏安全感

生活背景:

用户是一名年轻设计师，热爱阅读和运动，对生活品质有较高要求。目前面临出行不便、生活成本高、社交圈子小等问题。

用户角色画像02

个人信息:

姓名: 李小红 年龄: 35岁 性别: 女 职业: 教师

社会特征:

教育程度: 本科毕业 婚姻状况: 已婚 兴趣爱好: 烹饪、购物、看电影

痛点分析:

1. 出行不便 2. 生活成本高 3. 社交圈子小

生活背景:

用户是一名已婚教师，热爱烹饪和购物，对生活品质有较高要求。目前面临出行不便、生活成本高、社交圈子小等问题。

需求总结

出行不便 生活成本高 社交圈子小 缺乏安全感

Karimoku × BENWU — Design Study

A study of how woodcraft, material and space can connect furniture, photography and communication.

My role

Brand & material research · Spatial narrative

Stage

Design study · Retrospective analysis

This is a Karimoku × BENWU design study and retrospective reconstruction from the BENWU period. The current record does not establish an official commission, partnership, production or commercial outcome.

Credits and context / Level C

Design study and retrospective reconstruction from the BENWU period; research and design judgments shown here by Yingjie Sun

AI / Human: No AI generation or automated delivery is recorded; research judgments, material choices and attribution boundaries remain human-reviewed.

Human review: Verification of brand facts and project identity; Material, fabrication and supply-chain sample checks; Review of spatial movement and communication sequence

20

Biyuan AI — Identity & Product Experience

A shared identity, clear information hierarchy and continuous task paths for a multi-model service.

My role

Visual identity, UI design & experience iteration

Stage

Public website and model directory; product integrations in iteration

The public case records overall VI/UI and iteration collaboration. Biyuan models and services are credited to their providers; the case focuses on identity, interface and iteration decisions.

Credits and context / Level B

Overall VI/UI and iteration by Yingjie Sun; completed with the project team

AI / Human: Multiple model services form the product context; human responsibility covers brand hierarchy, interface structure, interaction trade-offs and pre-release review.

Human review: Review of brand and interface hierarchy; Checks on model output and state feedback; Review of launch scope and service ownership

21

YELISI — Brand, Product & CMF

Connecting a Chinese identity to product concepts through boundaries, curves and touch.

My role

Team collaboration · Identity, product concepts & CMF

Stage

Brand direction established; VI/UI, product and CMF concepts in progress

The public case presents the relationship between brand, product and CMF concepts. The product is shown at concept stage, with form, material and human–relation decisions documented.

Credits and context / Level C

Collaborative work with the project team; brand visual, product–concept and CMF direction by Yingjie Sun

AI / Human: No AI participation in brand direction or product concepts is recorded; material contact, connection and ergonomics require human and physical validation.

Human review: Team direction and version review; individual ownership and team size remain unverified; Physical tests for contact materials, magnetic force and release; Ergonomic, durability and manufacturing–feasibility validation

Periastra — Brand Strategy & System

Connecting positioning, typographic identity, information hierarchy and product language for a photography-equipment context.

My role

Team collaboration · Identity, applications & information systems

Stage

Strategy and identity study; application status requires project confirmation

The public case records collaborative brand-graphic and application research. Hasselblad-related material is presented as a Reference Study with source credit retained. Individual scope and application logic are documented in the case.

Credits and context / Level C

Collaboration with the project team; brand mark, applications and information-system direction by Yingjie Sun

AI / Human: The current record does not document AI participation in wordmark adoption or brand decisions; identity, information and applications were compared and confirmed by people.

Human review: Human team review of brand positioning and identity direction; Wordmark small-scale and fabrication-sample checks; Human review of the Hasselblad reference boundary

23

AI Video Systems — From Prompt Cases to Reusable Workflows

A 22-second vertical film records how storyboard, blocking, identity continuity and camera constraints can become a reviewable AI-video workflow.

My role

Independent research and workflow design

Stage

Independent applied research

The public page presents the author-supplied final film, newly authored system diagrams and the process used to organise the work. Credits identify source inputs, editable files and third-party media separately.

Credits and context / Level B

Final film and process account supplied by Yingjie Sun; public libraries, posts and articles are reference studies credited below

AI / Human: GPT 6 / Codex assisted plot-to-storyboard scripting, prompts and scene descriptions; Blender supported blocking; Seedance 2.5 rendered the final video. AI output does not replace decisions about camera, structure, selection or release.

Human review: Human approval of plot and storyboard script; Shot-by-shot review of identity, camera, action and physical relations; Review of source, reference scope, copy and public-display permission

[Read the complete case](#)

Image archive 03

Six control layers for an AI video workflow

Image archive 04

AI Video Systems — From Prompt Cases to Reusable Workflows

Review relationships, then revise the right layer

Structured prompt architecture for the AI video workflow

A searchable reference index, six control layers and eight analyses connect product, CMF, space and narrative. The personal 22.08-second film remains a process record; the page separates source analysis from personal workflow application. Explore Systems / AI video methods on the website.

24

Lensflow

A local AI creation workspace connecting image capture, structured analysis, prompt organisation and generation tasks.

My role

Collaborative work

Stage

Workspace, Chrome extension and product site

The public demo uses precomputed content and does not prove live model calls or broad compatibility. Open-source components are included; personal contribution is limited to the documented product, interaction and implementation collaboration.

Credits and context / Level B

Includes AI-assisted implementation and open-source components; dependency licenses retained

AI / Human: AI supports implementation and forms part of the workflow; analysis and generation in the demo are precomputed samples. Humans control input, editing, comparison, recovery and release decisions.

Human review: Human review of sources, prompts and task state; Partial-failure recovery and compatibility checks; Open-source license and release-boundary checks

Lensflow onboarding and demo workspace

Lensflow image analysis and structured results

25

Yantai — Form Study

Observe visual references, analyse form and transfer design methods before confirming an archive entry.

My role
Collaborative work
Stage

Form study and archiving tool, v0.7.5 RC

The public case records a product–form learning and archiving prototype with a demo fixture. Its public predecessor and upstream link are identified, and the lamp example is presented as a product–form study.

Credits and context / Level B

Collaborative work using open-source components; MIT and dependency licenses retained

AI / Human: AI can suggest observations, inferences and exercises; humans verify visual evidence, judge transferable methods and confirm archiving.

Human review: Separate review of observations, inferences and exercises; Human confirmation before archive writes; Private-module, public-predecessor and dependency-license boundary checks

[Read the complete case](#)

Yantai observation, analysis, transfer and archiving interface

26

Xintiao — Native WeChat Mini Program

A lightweight tool centered on today’s earned income, connecting a salary calendar, daily records and three-step onboarding.

My role

Product, interaction, visual and WeChat adaptation participation

Stage

Native mini-program development and validation

The public case records local development and simulator verification of a native WeChat mini-program. Its wage-calculation core reuses an AGPL-3.0-only upstream; it is not an official PayDance product, and launch or real-world accuracy are unverified.

Credits and context / Level B

Salary core reused from MrBaoboer/PayDance under AGPL-3.0-only; not an official PayDance product; presented as collaborative work

AI / Human: The current record does not document AI in wage calculation or interaction decisions; humans control product structure, interaction, visual design and platform adaptation.

Human review: Checks for wage rules, overnight shifts and breaks; Simulator state and theme-display review; Upstream AGPL attribution and platform-release checks

27

Formline — Geometry Studio

A local logo editor that keeps geometric construction and optical corrections visible and independently editable.

- My role
- Collaborative work
- Stage
- Local editor with desktop and mobile interfaces

The public case records a local Logo-editor prototype and its interface structure. Geometry solving and drawing use open-source components; itemized diagnostics are not presented as general automated capability.

Credits and context / Level B

- Collaborative work using PlaneGCS, Paper.js and other open-source components under their respective licenses
- AI / Human: The current record does not document AI generation in geometric decisions; humans control construction rules, optical correction, comparison and export approval.
- Human review: Human comparison of construction and optical correction; Review of export formats and diagnostic cues;
- Open-source dependency and license-boundary checks

Resume Formatter

An open-source fork bringing a master resume, job-specific versions, factual evidence and formatting into one workspace.

My role

Collaborative work on an open-source fork

Stage

v2.4.0, public web tool

The public tool is available online. It is a collaborative extension of an MIT-licensed upstream project with attribution retained; fictional demo résumés are shown as interface content for the product study.

Credits and context / Level A

Collaborative development of a fork of gracexygu/resume-formatter; upstream and this fork use the MIT License

AI / Human: AI rewriting is optional; humans choose, review diffs, verify dates and numbers, and approve or discard changes.

Human review: Fact evidence and job-version diff review; Import, layout and PDF-output checks; Upstream attribution, license and privacy-boundary checks

Read the complete case

Resume Formatter template and layout controls

29

Visual Archive

A Chrome extension prototype separating local image measurements, visual inferences and unknown information.

My role

Collaborative work

Stage

v0.1.0 prototype with local measurements and an ungenerated archive state

The public screens record a Chrome extension prototype, local measurements and a pending-generation state; they do not prove model accuracy, call success or hidden-geometry recognition.

Credits and context / Level B

Collaborative extension-prototype and interaction work

AI / Human: The model archive is not generated in the shown state; humans separate measurements, inferences, unknowns and reproduction plans.

Human review: Separate checks for local measurements and visual inference; Review of empty and pending-generation states; Source-file, prompt and privacy-boundary checks

31

Image Generation & Editing Study

Fictional packaging, poster and sketch tasks examining completion, product consistency and drift across successive image edits.

My role
Collaborative work
Stage

Research package completed; not published on Xiaohongshu

This page is a concept, prototype or research record in the personal archive; the case presents its design decisions, stage and source context.

Credits and context / Level C

Includes AI-generated images and a single evaluator’s visual assessment; the test brand is fictional; collaborative test-design and research-editorial work

AI / Human: AI is described only where the current project record supports it; humans remain responsible for framing, selection, fact checking, design judgment and release.

Human review: Review of source, attribution and public permission; Human checks on design judgment, state and boundaries; Pre-release checks on assets, copy and links
