

YINGJIE SUN

Industrial & Product Designer

Selected work

I design physical products, visual systems and AI-native workflows, connecting form, CMF, 3D and brand. I start with use and materials, then develop ideas through models, prototypes and comparison.

04 Hermès — Seasonal Window Worlds

20 YELISI — Brand, Product & CMF

09 Arc'teryx — Mountain Performance Field

23 Periastra — Brand Strategy & System

13 Karimoku × BENWU — Design Study

26 Biyuan AI — Identity & Product Experience

17 Aluminum Lighting System

30 AI Video Systems — From Prompt Cases to Reusable Workflows

From form to system

I design physical products, visual systems and AI-native workflows, connecting form, CMF, 3D and brand. I start with use and materials, then develop ideas through models, prototypes and comparison.

Understand use and constraints, then compare form, materials, hierarchy and interaction. Models and prototypes make choices discussable. AI supports references, variations and workflows; people retain judgment and verification.

FORM / SYSTEM / INTELLIGENCE

2026.02 — Present

Hangzhou Liling Enterprise Services

Brand design & project coordination

2025.08 — 2026.01

HannStar Board

Design systems engineering designer

2025.03 — 2025.12

BENWU

3D designer

2023.12 — 2025.02

Hunan Ouyin Culture & Media

Design assistant

2021.09 — 2025.06

Changzhou Institute of Technology

Bachelor's degree in Product Design

01

Hermès — Seasonal Window Worlds

Contributing to three seasonal window narratives through merchandise, props, material and light.

My role

BENWU team · 3D design & visual presentation

Stage

Commercial window-design archive

The public case records BENWU collaboration, Yingjie Sun's participation in 3D design and visual presentation, and retained project views. The newly supplied Summer, Autumn and Winter board sets are treated as Level C retrospective reconstruction material until primary sources are verified. Individual leadership, France communication, production and store-delivery boundaries remain unverified.

Credits and context / Level B

BENWU team collaboration; spatial and visual design by Yingjie Sun; Hermès branding and trademarks belong to their rights holders

AI / Human: The current project record does not document AI as a source of the design outcome; the page presents verified team collaboration and 3D/visual participation, while personal delivery boundaries remain unverified.

Human review: Human review of 3D design and visual presentation within the team; Review of merchandise hierarchy, prop scale and window proportions; Production, store and mall delivery boundaries require source records

[Read the complete case](#)

Summer: props connect the merchandise

Summer window with a fishing rod, folding chair, fish props and a speech bubble

Summer window with a mannequin, drink-shaped prop, orange slice and COOL speech bubble

Fishing rods, hands and folding chairs create a viewing path. Compare product position, prop scale and background contrast so the narrative keeps merchandise legible.

Autumn: familiar frames, unfamiliar scale

Autumn window with an oversized pink fish passing through a doorway beside a mannequin

Autumn window with a yellow snail, an open door and a suspended pink bag

Doors, windows and walls establish spatial references. Oversized animals disrupt those references while framing and suspension separate merchandise from large props.

Winter: different rhythms for different windows

Wide winter window with a large white horse head, snowy planes, a yellow bag and a small pink horse

Layered white horse contours and suspended accessories against a blue background

Wide windows connect products across snow planes. Tall windows build a vertical hierarchy around the horse. Each format requires a new composition.

From visual direction to spatial relationships

Hermès

让季节叙事成为商品的观看路径

设计逻辑 · 从成品与原稿中展开的决策解析

01 识别焦点

白马大轮廓建立远距离识别
黄色包袋留在前景右侧

02 组织层次

鬃毛切片与投影叠出体量
蓝绿背景让白色轮廓清晰

03 延续叙事

小马与滑雪剪影形成尺度差
道具、商品和场景相互呼应

从设计方向到展示落地

季节主题

→ 整体设计稿

→ 法国方面沟通

→ 工厂生产衔接

→ 门店与商场展示

职责范围：方向与整体设计稿 / 约 8 人团队 / 方案沟通 / 生产与展示衔接

From visual direction to spatial relationships

My contribution was 3D design and visual presentation within BENWU. The retrospective diagram compares composition and merchandise hierarchy; individual production and store-delivery responsibility is not established.

02

Arc'teryx — Mountain Performance Field

Translating terrain, bodies and equipment into spatial layers for the Alpha Center window display.

My role

BENWU team · 3D design & spatial visualisation

Stage

Commercial window–design archive

The public case presents BENWU collaboration, Yingjie Sun's participation in 3D design and visual presentation, and the retained Alpha Center window view; individual leadership, production, display, sales or performance outcomes are not inferred from imagery.

Credits and context / Level B

BENWU team collaboration; spatial and visual design by Yingjie Sun; Arc'teryx branding and trademarks belong to their rights holders

AI / Human: The current project record does not document AI as a source of the design outcome; the case presents verified team collaboration and 3D/visual participation without inferring performance or personal delivery outcomes.

Human review: Human review of 3D design and overall composition within the team; Review of equipment, body and spatial occlusion; Production and store–display boundaries require source records

[Read the complete case](#)

Terrain, body and equipment

Arc'teryx Mountain Performance Field | user-supplied retrospective board 01 / 10

Arc'teryx Alpha Center window with rock forms, layered curves and a mannequin holding poles

A rock face anchors the background, layered contours form the middle ground and a mannequin establishes human scale. Their boundaries and overlap help equipment remain readable.

Communicate spatial relationships

Arc' teryx

让环境有张力，让装备被看见

设计逻辑 · 从成品与原稿中展开的决策解析

01 环境语义

岩壁块面与横向线组传递地形
场景聚焦户外装备的使用语境

02 主体识别

人台与登山杖留在前景
紫色上装与岩壁形成色彩区分

03 画幅控制

保留品牌标识和完整窗框
信息排版顺应原有竖向构成

从设计方向到展示落地

户外方向

→ 空间方案

→ 法国方面沟通

→ 工厂生产衔接

→ 终端展示协同

职责范围：方向与整体设计稿 / 约 8 人团队 / 方案沟通 / 生产与展示衔接

Return to display scale

Compare the rock face, curves and equipment as distinct layers. Window format, lighting and product visibility guide the spatial reading.

The window in its retail context

Arc'teryx Alpha Center installation, front window

Arc'teryx mountain-performance retail interior

Additional installation views connect the window with the interior. Rock, directional lines, mannequins and moss surfaces extend the mountain language around clothing and circulation.

03

Karimoku × BENWU — Design Study

A study of how woodcraft, material and space can connect furniture, photography and communication.

My role

Brand & material research · Spatial narrative

Stage

Design study · Retrospective analysis

This is a Karimoku × BENWU design study and retrospective reconstruction from the BENWU period. The current record does not establish an official commission, partnership, production or commercial outcome.

Credits and context / Level C

Design study and retrospective reconstruction from the BENWU period; research and design judgments shown here by Yingjie Sun

AI / Human: No AI generation or automated delivery is recorded; research judgments, material choices and attribution boundaries remain human-reviewed.

Human review: Verification of brand facts and project identity; Material, fabrication and supply-chain sample checks; Review of spatial movement and communication sequence

[Read the complete case](#)

Brand foundations

Karimoku × BENWU | user-supplied retrospective board 01 / 20

Woodcraft, furniture and everyday life frame this retrospective design study. The material does not establish an official commission.

A material system

Karimoku × BENWU | user-supplied retrospective board 07 / 20

Wood, surface, joints and edges organise the material language. Species, finishes and durability require samples and engineering validation.

Void and layers

Karimoku × BENWU | user-supplied retrospective board 15 / 20

Spacing, layers, movement and light connect objects with their photographic representation. These images are design studies.

04

Aluminum Lighting System

One section across different uses: a family of table, floor, wall and pendant lights.

My role

BENWU team · 3D design & visual presentation

Stage

Lighting family and spatial presentation

This page is a concept, prototype or research record in the personal archive; the case presents its design decisions, stage and source context.

Credits and context / Level B

Collaboration with the BENWU team; BENWU EDITION branding and trademarks belong to their respective rights holders

AI / Human: AI is described only where the current project record supports it; humans remain responsible for framing, selection, fact checking, design judgment and release.

Human review: Review of source, attribution and public permission; Human checks on design judgment, state and boundaries; Pre-release checks on assets, copy and links

[Read the complete case](#)

A shared section across different uses

Silver table lamp with a circular base beside an open book on a blue surface

Full view of a silver floor lamp against black

Table and floor lights share a linear body, luminous strips and distinctive ends. Support, length and direction change around the use scenario.

Separate material and functional cues

Detail of a gold light body with longitudinal light strips and a circular control

Horizontal pendant with parallel light strips, metal channels and end details against a dark background

Metal channels, luminous surfaces and circular controls explain different roles. Renderings support comparison of reflection and proportion; optical performance requires testing.

05

YELISI — Brand, Product & CMF

Connecting a Chinese identity to product concepts through boundaries, curves and touch.

My role

Team collaboration · Identity, product concepts & CMF

Stage

Brand direction established; VI/UI, product and CMF concepts in progress

The public case presents the relationship between brand, product and CMF concepts. The product is shown at concept stage, with form, material and human–relation decisions documented.

夜 礼 司

Credits and context / Level C

Collaborative work with the project team; brand visual, product–concept and CMF direction by Yingjie Sun

AI / Human: No AI participation in brand direction or product concepts is recorded; material contact, connection and ergonomics require human and physical validation.

Human review: Team direction and version review; individual ownership and team size remain unverified; Physical tests for contact materials, magnetic force and release; Ergonomic, durability and manufacturing–feasibility validation

[Read the complete case](#)

From historical exploration to a private seal

Historical Songnasty identity exploration

Current Yelisi brand identity

The earlier Songnasty exploration and current YELISI mark show a shift in identity language. Seal, folded line and cut-corner forms connect naming, graphics and product context.

Connect identity, products and CMF

YELISI | user-supplied retrospective board 01 / 20

Design decisions and system applications (Chinese diagram)

Collaborative brand and product-concept work shares a material direction. The archive supports comparison of form and surface; no manufacture or market launch is claimed.

06

Periastra — Brand Strategy & System

Connecting positioning, typographic identity, information hierarchy and product language for a photography-equipment context.

My role

Team collaboration · Identity, applications & information systems

Stage

Strategy and identity study; application status requires project confirmation

The public case records collaborative brand-graphic and application research. Hasselblad-related material is presented as a Reference Study with source credit retained. Individual scope and application logic are documented in the case.

Credits and context / Level C

Collaboration with the project team; brand mark, applications and information-system direction by Yingjie Sun

AI / Human: The current record does not document AI participation in wordmark adoption or brand decisions; identity, information and applications were compared and confirmed by people.

Human review: Human team review of brand positioning and identity direction; Wordmark small-scale and fabrication-sample checks; Human review of the Hasselblad reference boundary

[Read the complete case](#)

Build the system around recognition

Periastra | user-supplied retrospective board 01 / 15

Design decisions and system applications (Chinese diagram)

Compare the photography-equipment context, name recognition and small-scale legibility. The wordmark anchors the visual and information system.

Compare the wordmark at different scales

Periastra wordmark study

The PERIASTRA wordmark study, dated 9 June 2026, supports comparison of letterforms, hierarchy, application scale and production direction.

07

Biyuan AI — Identity & Product Experience

A shared identity, clear information hierarchy and continuous task paths for a multi-model service.

My role

Visual identity, UI design & experience iteration

Stage

Public website and model directory; product integrations in iteration

The public case records overall VI/UI and iteration collaboration. Biyuan models and services are credited to their providers; the case focuses on identity, interface and iteration decisions.

Credits and context / Level B

Overall VI/UI and iteration by Yingjie Sun; completed with the project team

AI / Human: Multiple model services form the product context; human responsibility covers brand hierarchy, interface structure, interaction trade-offs and pre-release review.

Human review: Review of brand and interface hierarchy; Checks on model output and state feedback; Review of launch scope and service ownership

Read the complete case

Understand the service, then take action

Biyuan desktop homepage

The VI/UI connects brand expression with service entry points. The homepage introduces the offer before presenting the main action.

Support browsing and deliberate search

Biyuan model directory

Filtered model search

Model lists and name search support two different tasks. Hierarchy helps users identify a model, understand its entry point and continue.

Preserve the main action on mobile

Biyuan mobile homepage

I designed and iterated the VI/UI. The mobile study rearranges content by priority, checking text, actions and scrolling. This archive does not establish ownership of the deployed service.

08

AI Video Systems — From Prompt Cases to Reusable Workflows

A 22-second vertical film records how storyboard, blocking, identity continuity and camera constraints can become a reviewable AI-video workflow.

My role

Independent research and workflow design

Stage

Independent applied research

The public page presents the author-supplied final film, newly authored system diagrams and the process used to organise the work. Credits identify source inputs, editable files and third-party media separately.

Credits and context / Level B

Final film and process account supplied by Yingjie Sun; public libraries, posts and articles are reference studies credited below

AI / Human: GPT 6 / Codex assisted plot-to-storyboard scripting, prompts and scene descriptions; Blender supported blocking; Seedance 2.5 rendered the final video. AI output does not replace decisions about camera, structure, selection or release.

Human review: Human approval of plot and storyboard script; Shot-by-shot review of identity, camera, action and physical relations; Review of source, reference scope, copy and public-display permission

[Read the complete case](#)

A controllable creative workflow

Workflow map from case observation to a reviewed output

A Blender blocking frame from the supplied source video used to check camera and cast relations

A film-language reference, a new story and two character inputs become a storyboard, Blender blocking, controlled imagery and prompts, then a Seedance 2.5 render. The 11 storyboard units and 20+ characters are my process-log counts.

Review relationships, then revise the right layer

Six control layers for an AI video workflow

Review relationships, then revise the right layer

A searchable reference index, six control layers and eight analyses connect product, CMF, space and narrative. The personal 22.08-second film remains a process record; the page separates source analysis from personal workflow application. Explore Systems / AI video methods on the website.
